

Just use schema:location to associate something with a spatial Feature

WAMEX
WX_ReportProfile
and other reference
tables

schema:about

time:hasTime

It's a time object with a start & end therefore
a duration. No need for a role

Project Pattern

Report

schema:name

schema:dateCreated

schema:description

schema:identifier with special
Datatype pattern

Attached non-RDF Object Pattern

```
<x> prof:hasResource [  
  schema:name "MRT File";  
  schema:url "...URL/file..."^^xsd:anyURI;  
  dcterms:conformsTo "...some specification...";  
  dcterms:format "application/pdf";  
  dcterms:fileSize 123456;  
];
```
